Unit Specification

UBT123X – Individual eyelash extensions
Unit reference number: K/507/5472

Level: 3
Guided Learning (GL) hours: 20

Overview
This unit is about providing eyelash extension treatments involving the use of individual eyelashes. Learners will gain the ability to attach, maintain and remove individual eyelash extension systems as well as developing an understanding of the products used and suitable aftercare advice to be given.

To carry out this unit, learners will need to maintain effective health, safety and hygiene throughout working practices. Learners will also need to maintain personal appearance and effective communication techniques with the client.

Learning outcomes
On completion of this unit, learners will:

LO1 Know the salon requirements for individual eyelash extension application
LO2 Understand the effects, choices and application of individual eyelash extensions
LO3 Be able to prepare the client, self, and work area for individual eyelash extension application
LO4 Be able to provide, maintain and remove individual eyelash extension systems
Unit content

LO1 Know the salon requirements for individual eyelash extension application

Describe how to set up the work area:

Taught content

- Prepare the work area to allow for
  - Ease of access to all products, tools and equipment
  - Hygienic set up of work area
  - Effective lighting to promote accuracy
  - Correct positioning of client and therapist
- Ensure a safe working environment
  - Clean and hygienic work area
  - Sufficient ventilation
  - Effective positioning of couch and salon chairs close to work surface to allow ergonomic and safe practice

Describe how professional beauty therapists present themselves:

Taught content

- Clean professional uniforms create a positive impression of the beauty therapist and the salon. Uniforms should be made from a comfortable fabric to facilitate movement throughout treatment
- Beauty therapists should wear closed-in footwear, no jewellery, no piercings, hair neatly tied back, and any fringe secured, clean, short and well maintained nails
- Personal hygiene and cleanliness including showering, covering cuts and abrasions, wearing deodorant or antiperspirant, oral hygiene (clean teeth, fresh breath), are all important elements of professional presentation

Explain the salon requirements for record keeping:

Taught content

- Accurate appointment systems, stationery, loyalty, rewards, acknowledgement of occasions
- Consultation record keeping, contra-indications, signatures, reference to existing records, information clear, accurate and in logical order (name, address, contact numbers, age range, reason for treatment, occupation, sport/hobbies, medical history, current condition of nails, allergies/hypersensitivity, contact lenses, contra-actions)
- Skin sensitivity tests, adaptations and modifications, recommendations
- Treatment plan, update record at the end of the treatment, update at each visit, maintained electronically, paper records
Explain the importance of patch tests:

Taught content

- A patch test is designed to alert the therapist to any pre-disposed skin sensitivity on the client’s behalf. Any active, new or known ingredient that can potentially produce a reaction is usually patch tested 24-48 hours before treatment. All patch tests provided need to be noted and recorded, listing all products and where patch test took place on the body if appropriate, client signature and date.
- Patch testing for individual eyelash applications would include all active or new products to be used within the treatment such as the adhesive and adhesive remover. Client records need to be updated with results. They are conducted to ascertain suitability of products and sensitivity of the client.
- Patch test application techniques
  - Cleanse area (either crook of elbow or behind ear)
  - Apply product to the area with a brush
  - Allow to dry
  - Leave on for a minimum of 24 hours
  - Explain positive and negative reactions
  - Record results, products used and where placed on record card

Explain how to interpret results of the patch test:

Taught content

- Positive – red, itchy, irritated, swelling, sore
- Negative – no change to skin

Explain the insurance requirements for individual eyelash extension treatments:

Taught content

- As a minimum a salon should hold, where applicable, employer’s liability insurance as well as public liability insurance and professional indemnity insurance

Describe the legal requirements for providing treatments to minors:

Taught content

- The age at which an individual is classed as a minor and how this differs nationally
LO2 Understand the effects, choices and application of individual eyelash extensions

### Describe the factors that influence individual eyelash extension application treatments:

**Taught content**

- Pre-treatment tests – the client must have a patch test to check sensitivity 24-48 hours before treatment
- Hair growth cycle should be considered as this affects growth and thickness of natural lashes
- Thickness, length, and colour of natural lashes will affect product selection and the finished result
- Client’s lifestyle may affect longevity of individual lash extensions
- Age of client – a more mature client may require individual lash extensions that are lighter in colour and reduced in thickness
- Professional removal must be recommended to prevent damage to the natural lashes
- Incorrect removal of lash extensions

### Describe the products used in individual eyelash extension treatments:

**Taught content**

- Non-oily eye cleanser, pre-lash primer, adhesives, eyelash extensions (various lengths, curvature, colour, thickness), adhesive remover, eye gel patches, eye wash solution, antiseptic swabs, hand sanitiser
- Eyelash systems available – strip lashes, flares, semi-permanent lashes, eyelash extensions (thickness of lash: 0.10mm, 0.15mm, 0.20mm, 0.25mm), (curvature of lash: J, C, C Y, D, B), (length of lash: 6, 7, 8, 9, 10, 11, 12, 13, 14, 15mm)

### List the benefits of individual eyelash extension application treatments:

**Taught content**

- Enhances natural lashes
- Opens eye area and corrects eye shape
- Longer lasting lash effects for visual impact
- Thickens the lashes and disguises any natural gaps
- Provides confidence to the client
- Replaces mascara for everyday wear, special occasions and holidays
Describe the limitations to the effects and applications of individual eyelash extension treatments:

**Taught content**

- Thin, sparse natural eyelashes
- Short and weak eyelashes
- Claustrophobic/nervous clients
- Wearers of heavy eye make-up
- Clients who touch their eyes and lashes often
- Hypersensitive/watery eyes
- Hay fever and other allergies
- Eye shape and size

Describe how to maintain and remove (where appropriate) individual eyelash extensions:

**Taught content**

- Correct and safe removal of individual lash extensions
- Avoidance of damage to natural lashes
- Removal of products from natural lashes
- Recommendations for maintenance every two weeks
- Return to salon for safe removal

Explain the contra-indications to individual eyelash extension treatments that prevent or restrict treatment:

**Taught content**

- If a client presents with symptoms that are not identifiable the learner must refer the client to a health care practitioner for appropriate care and diagnosis. Therapists can refer the client directly to their general practitioners. They are not qualified to diagnose diseases and disorders
- Examples of contra-indications that may prevent treatment (absolute contra-indications) – contagious diseases and disorders of the eye including conjunctivitis and blepharitis, trichotillomania, recent eye surgery and chemotherapy
- Examples of contra-indications that may restrict treatment (relative contra-indications) – psoriasis, styes, dry eye syndrome, glaucoma, contact lenses, thyroid imbalances

Explain how to refer the client to a health practitioner and why:

**Taught content**

- If a client presents with symptoms that are not identifiable the learner must refer the client to a health care practitioner for appropriate care and diagnosis. Therapists can refer the client directly to their general practitioners. They are not qualified to diagnose diseases and disorders
- Common symptoms warranting referral
  - Undiagnosed eye diseases and disorders
  - Oedema and erythema in related treatment areas
Explain the possible contra-actions that may occur during or after individual eyelash extension application treatments:

**Taught content**

- Mild irritation, watering or redness
- Extreme skin irritations, itchiness, redness, burning, swelling, watery eyes
- Adhesive entering the eye resulting in, skin irritations, itchiness, redness, burning, swelling, watery eyes
- Thickening of the cornea
- Overstimulation of the meibomian gland

Describe how to effectively respond to contra-actions:

**Taught content**

- Establish if it is an expected reaction or a contra-action
- In the case of expected reactions, provide immediate and homecare advice
- In the case of a contra-action, discontinue treatment, take remedial action, record contra-action, advise on home care and how to access remedial medical care if required
### LO3 Be able to prepare the client, self and work area for individual eyelash extension application

#### Prepare and check the client, work area, equipment and products for treatment:

**Taught content**

- Prepare treatment area according to salon requirements – ensure the area is well lit, with adequate ventilation
- Prepare yourself and your client using appropriate products and techniques
- Check the client by completing the consultation process
- Ensure all equipment and products are to hand and are working efficiently
- Use safe working practices
  - Position yourself to avoid injury
  - Position your client
  - Position your equipment

#### Agree the treatment with the client and check for contra-indications or restrictions to treatment:

**Taught content**

- Verbal communication – use a speaking manner and tone suited to the client and your surroundings. Be sensitive to the client, use open questioning related to the treatment to establish their suitability for treatment
- Non-verbal communication – eye contact, body language, listening
- Perform a consultation with the client to check for contra-indications, ask relevant questions and document and record the client feedback. Prior to commencement of the treatment complete a visual observation of the treatment area to re-affirm client’s eligibility for treatment
- Record keeping – contra-indication check, signatures, name, address, contact numbers, age range, reason for treatment, occupation, sports/hobbies, medical history, allergies/hyper-sensitivity, contact lenses, contra-actions, skin sensitivity tests
- Ensure the client confirms agreement to treatment

#### Explain the treatment procedure taking into account the client’s expectations and other influencing factors:

**Taught content**

- Step-by-step explanation, using clear non-technical language and confirm client understanding
- Ensure the client is clear about the areas to be treated, what clothing needs to be removed, the necessary positions to adopt for application

#### Instruct the client on how to prepare for the individual eyelash extension application:

**Taught content**

- Removal of clothing as appropriate, positioning throughout the treatment communicating clearly
LO4 Be able to provide, maintain and remove individual eyelash extension systems

Prepare the client’s eyes for treatment:

Taught content

- Remove or protect clothing as appropriate
- Position the client with good support
- Explain each stage of the treatment
- The area should be cleansed using a suitable non-oily eye make-up remover
- Establish
  - Hair growth pattern, length, colour and curvature of natural eyelashes
  - Current sensitivity levels, skin condition, medication and health concerns
  - Client expectations and wishes

Establish the client’s desired appearance of eyelashes before commencement of treatment:

Taught content

- Client preference, face and eye shape (round, almond, deep set eyes)
- Natural: 30-50 lashes per eye
- Enhanced: 50-70 lashes per eye
- Thick and full: 80 plus lashes per eye

Select the products, tools, equipment and different systems available to carry out individual eyelash extension treatments:

Taught content

- Products – non-oily eye cleanser, pre-lash primer, adhesives, eyelash extensions (various lengths, curvature, colour, thickness), adhesive remover, eye gel patches, eye wash solution, antiseptic swabs, hand sanitiser
- Tools – micropore tape, air blower, x-type tweezers, straight tweezers with fine point, disposable micro brushes, disposable sponge applicators, disposable mascara brushes, lash extension holder, lash mat
- Equipment – magnifying lamp, towels, disposable paper roll, tissue, cotton wool, pillow, headband
## Apply individual eyelash extensions in line with the manufacturer’s instructions:

**Taught content**

- Choose appropriate eyelash system as agreed with client
- Select lashes of suitable length and thickness and adapt to create required effect
- Use individual lash extension application techniques in accordance with manufacturers’ instructions and secure lashes in the required direction
- Remove excess adhesive throughout the attachment process
- Allow sufficient time for the adhesive to dry
- Comb through lashes to blend individual lash extensions with the natural lashes
- Achieve a well-balanced look that meets the client’s requirements
- Reassure the client and communicate your positioning instructions clearly during the treatment

## Provide aftercare advice:

**Taught content**

- Advise the client to avoid touching the eyes, do not use oil-based products, avoidance of any heat or water for the first 24 hours, maintenance appointments if required, professional removal of lashes
- Provide maintenance treatments
  - Agree a time span for infill appropriate to the client’s individual needs
  - Follow manufacturers’ guidance
  - Importance of correct preparation
  - Removal of product build up and debris
  - Reapply extensions to infill gaps 1-2mm from eyelid

## Update the client treatment records:

**Taught content**

- Maintain the client record card, complete with all necessary details, for example, thickness and curvature of lashes

## Prepare the work area for the next treatment:

**Taught content**

- Dispose of all waste, clean equipment, sterilise all metal tools, sanitise working surface/work area, set up trolley, clean couch roll and position couch and chair, replace clean tools, stock up lashes for next treatment, ensure record card for next client is ready for completion
Employability skills to be demonstrated throughout the practical assessment

**Communication:**

<table>
<thead>
<tr>
<th>Taught content</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Adapt and tailor approach for different clients for example, new and existing clients</td>
</tr>
<tr>
<td>• Allow sufficient time for the consultation and communicate clearly and concisely to explain the concept of the treatment/service, encouraging clients to ask questions and offer reassurance</td>
</tr>
<tr>
<td>• Use positive verbal communication, for example, speaking manner and tone of voice, being supportive, respectful, sensitive to client, using open questioning to obtain information</td>
</tr>
<tr>
<td>• Use positive non-verbal communication for example, eye contact, body language, actively listening</td>
</tr>
<tr>
<td>• Promote goodwill and trust by using good communication</td>
</tr>
</tbody>
</table>

**Customer service:**

<table>
<thead>
<tr>
<th>Taught content</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Have an awareness of the principles of customer service, for example, quality, keeping promises, managing customer expectations, customer satisfaction, speed of services and treatments, offering reassurance</td>
</tr>
<tr>
<td>• Show good practice in customer service, for example, meeting and exceeding customer needs and expectations, demonstrating a willingness to please the customer, treating the customer as an individual</td>
</tr>
<tr>
<td>• Invest time in explaining the concept of the treatment/service clearly but concisely to the client, encouraging them to ask questions</td>
</tr>
<tr>
<td>• Deal quickly and effectively with any complaints or issues, for example, know whom to refer to if needed</td>
</tr>
<tr>
<td>• Know the importance of customer service to a business, for example, professional image, reputation, customer retention, customer satisfaction, customer relationships</td>
</tr>
<tr>
<td>• Know the impact of poor customer service, for example, dissatisfied customers will seek out competitors, loss of reputation, loss of profit, frequent complaints</td>
</tr>
<tr>
<td>• Manage client expectations and identify requirements</td>
</tr>
</tbody>
</table>
**Commercial and environmental awareness:**

<table>
<thead>
<tr>
<th>Taught content</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Adopt eco-friendly and cost-efficient use of resources, minimising waste for example, all products measured correctly, efficient use and correct disposal of consumables; recycle where possible</td>
</tr>
<tr>
<td>• Be aware of others and protect their ‘space’ when using products, specifically aerosols</td>
</tr>
<tr>
<td>• All used products will be disposed of in accordance with the salon rules and legislative guidelines</td>
</tr>
<tr>
<td>• Ensure all electrical equipment switches are turned off when not in use</td>
</tr>
<tr>
<td>• Identify opportunities to promote and sell additional products and treatments, for example, during consultation or when providing aftercare advice</td>
</tr>
<tr>
<td>• Talk and actively listen, to gain knowledge of client preferences and routines so that the retail selling approach is personalised</td>
</tr>
<tr>
<td>• Be aware of competitors for commercial success, for example, local salon offers and promotions, new treatments/services</td>
</tr>
<tr>
<td>• Know the unique selling points of treatments/services to offer the most appropriate advice</td>
</tr>
<tr>
<td>• Know business goals and sales targets to encourage focus on the vision of the business and its long term goals, for example, seasonal promotional offers</td>
</tr>
<tr>
<td>• Know how to advertise and display special offers, promotions, for example, local newspaper stories, awards, photographs, thank you letters/cards</td>
</tr>
<tr>
<td>• Promote any loyalty schemes or special offers for repeat/new clients and the benefits of other products and services, for example, buy one get one free, introductory offers</td>
</tr>
<tr>
<td>• Offer new/additional products and services to existing or new clients to promote self/salon experiences</td>
</tr>
<tr>
<td>• Ensure the cost reflects the time taken to provide the treatment/service, reflecting commercial times allocated, for example, tailor cost to client characteristics</td>
</tr>
</tbody>
</table>
Skin cancer awareness

Please note this information will not be assessed for the achievement of this unit.

Taught content

Public awareness of skin cancer has never been higher, and yet skin cancer remains the fastest growing cancer in the UK, especially amongst young people. The chances of a positive outcome can be dramatically increased with early identification and diagnosis.

Professionals in hair, beauty, sports massage and health and wellbeing industries work closely with clients and in many cases have sight of areas of skin which may not be easily visible to the client. An informed awareness of the signs, symptoms and changes of appearance to be aware of when checking for early signs of cancer is a crucial tool for the conscientious practitioner in order to provide the most thorough service and in some cases, possibly lifesaving information signposting.

Signs to look for when checking moles include utilising the ABCDE guide:

| A | Asymmetry – the two halves of the area/mole may differ in their shape and not match. |
| B | Border – the edges of the mole area may be irregular or blurred and sometimes show notches or look ‘ragged’. |
| C | Colour – this may be uneven and patchy. Different shades of black, brown and pink may be seen. |
| D | Diameter – most but not all melanomas are at least 6mm in diameter. If any mole gets bigger or changes see your doctor. |
| E | Elevation/evolving – elevation means the mole is raised above the surface and has an uneven surface. Looks different from the rest or changing in size, shape or colour. Anyone can get a suspicious mole or patch of skin checked out for free by the NHS by visiting their doctor, who may then refer to a dermatologist (an expert in diagnosing skin cancer). |

If you require any additional NHS information please refer to [https://www.nhs.uk/be-clear-on-cancer/symptoms/skin-cancer](https://www.nhs.uk/be-clear-on-cancer/symptoms/skin-cancer)

If your learners are interested in learning more about skin cancer awareness alongside this qualification, VTCT offers the following qualification: VTCT Level 2 Award in Skin Cancer Awareness for Non-Healthcare Professionals.

This qualification has been specifically designed for those working in the sports massage, health and wellbeing, beauty, hairdressing and barbering sectors. It will enable learners to identify any changes to their client’s skin and to highlight those changes to the client using appropriate language and communication skills. It will enable the learner to raise awareness of skin cancer and signpost their clients to public information about skin cancer.

This qualification will enable hair, beauty and wellbeing professionals to gain the appropriate knowledge and communication skills required to provide non-diagnostic, professional advice and information to clients in a discrete, empathetic and confidential manner.

For more information please refer to the Record of Assessment book: [https://qualifications.vtct.org.uk/finder/qualfinder/1Record%20of%20Assessment%20Book/AG20529.pdf](https://qualifications.vtct.org.uk/finder/qualfinder/1Record%20of%20Assessment%20Book/AG20529.pdf)
Assessment requirements

Learners must produce a portfolio of evidence which includes:

1. Treatment portfolio
2. Summative practical assessment

1. Treatment portfolio

Learners must produce a treatment portfolio that includes evidence of individual eyelash extension treatments carried out with proficiency.

At a minimum the treatment portfolio for this unit must include client consultation and treatment records covering all of the following:

- A minimum of 4 individual eyelash extension applications. The learner must have carried out these treatments on at least 3 different clients to include:
  - A full set of individual eyelash extensions
  - A partial set of individual eyelash extensions
  - A complete set of infills (maintenance)

- Used all products
  - Non-oily eye cleanser
  - Pre-lash primer
  - Adhesives
  - Eyelash extensions (various lengths, curvature, colour, thickness)
  - Adhesive remover
  - Eye gel patches
  - Eye wash solution
  - Antiseptic swabs
  - Hand sanitiser

- Used all tools
  - Micropore tape
  - Air blower
  - X-type tweezers
  - Straight tweezers with fine point
  - Disposable brushes and sponges where appropriate
  - Lash extension holder
  - Lash mat
• Used all equipment
  - Magnifying lamp
  - Towels
  - Disposable paper roll
  - Tissue
  - Cotton wool
  - Pillow
  - Headband

• Given all types of advice and recommendations
  - Aftercare
  - Avoidance of activities that may cause contra-actions
  - Post-treatment restrictions
  - Products for home use that will benefit the client
  - Homecare and maintenance of individual lash extensions
  - The importance of professional removal and additional services

Evidence from the one summative practical assessment must also be presented in the portfolio.

The treatment portfolio must be completed prior to learners undertaking the one summative practical assessment.

The maximum service time for individual eyelash extension treatment is 120 minutes.

2. Summative practical assessment

Learners must carry out and complete an individual eyelash extension treatment which will be observed and marked by centre assessors.

The practical assessment must take place in a real or realistic working environment on a real client. At a minimum the summative practical assessment for this unit must cover:

• Application of a full set of individual eyelash extensions
• Recommended summative practical assessment time – 120 minutes

Recorded professional discussion can also be used as an assessment method attached to the practical assessment and is particularly useful for gathering evidence for criteria related to evaluation and reflection. Professional discussions should be planned and recorded.
Assessment criteria

In order to pass this unit, learners must achieve all pass criteria. The pass criteria relate to the proficient demonstration of skills and knowledge.

Assessment guidance

Assessors must use the amplified assessment guidance in this section to judge whether assessment criteria have been achieved in the practical assessment.

**P17 – Prepare and check the client, work area, products and equipment for treatment**

Learners must demonstrate that they have sanitised their hands and cleansed the client’s eye area and lashes, removing make-up where appropriate, and leaving the lashes free from product debris. Learners must carry out final preparation/checking of work area prior to commencement of treatment.

Learners must demonstrate that they have set up the work area in line with the treatment requirements, and have met the health and safety requirements. Learners must use suitable lighting, temperature, ventilation and appropriate background music. All the required products, tools and equipment for the treatment are to hand and are fully stocked in advance.

**P18 – Agree the treatment with the client and check for contra-indications or restrictions to treatment**

Learners must demonstrate that they have consulted with the client using appropriate questioning techniques, as well as conducting visual and manual checks for contra-indications. Learners must explain the treatment in full to the client and ascertain the client’s treatment expectations. Learners must check the results of the patch test and correctly identify any treatment limiting conditions during the consultation and recommend the most appropriate method of individual false eyelash application. Any treatment preferences should also be discussed and agreed with the client.

**P19 – Explain the treatment procedure taking into account the client’s expectations and other influencing factors**

Learners must explain the treatment step by step to the client. At a minimum the explanation should include the benefits of the treatment and an estimated timescale.

**P20 – Instruct the client on how to prepare for the individual eyelash extension application**

Learners must instruct the client on any outer clothing that needs to be removed and where to store the clothing. The client’s jewellery must be removed and stored safely. Guidance should be given to the client on positioning for maximum comfort during the treatment.

**P21 – Prepare the client’s eyes for treatment**

Learners must demonstrate that they have sanitised their hands and cleansed the client’s eye area and lashes, removing make-up where appropriate, and leaving the lashes free from product debris.
**P22 – Establish the client’s desired appearance of eyelashes before commencement of treatment**

Learners must establish the client’s desired appearance of eyelashes. Natural, enhanced, or thick and full variations should be discussed and the client’s preference matched to the appropriate quantity of lash extensions per eye.

**P23 – Select the products, tools, equipment and different systems available for individual eyelash extension treatment**

Learners must demonstrate that they have selected the correct equipment, tools and products to match the treatment objectives and client’s requirements. All application techniques should be carried out safely and proficiently to meet the treatment/eyelash effect objectives.

**P24 – Apply individual eyelash extensions in line with the manufacturer’s instructions**

Learners must demonstrate that they have selected the correct equipment, tools and products to match the treatment objectives and client’s requirements. All application techniques should be carried out safely and proficiently to meet the treatment/eyelash effect objectives. Learners must complete the treatment in a commercially viable time (as agreed with the assessor). Learners must note down any contra-actions or findings during the treatment if appropriate. Learners must ensure client satisfaction and eyelash effect objectives have been met.

**P25 – Provide aftercare advice**

Learners must demonstrate that they can provide feedback and aftercare to the client describing any findings during eye and skin analysis, providing information on further treatment options and requirements for maintenance, explaining the importance of homecare for longevity of eyelash effect, providing advice on retail products to enhance treatment benefits, describing possible contra-actions that may occur.

**P26 – Update the client treatment records**

Learners must fully complete the treatment records to meet the salon requirements and show an understanding of the legal requirements for record keeping.

**P27 – Prepare the work area for the next treatment**

Learners must demonstrate they have prepared the work area by removing used couch roll, wiping down the trolley/working surfaces and sterilising metal tools. Re-stock products and consumables. The work area must be tidy and ready for the next treatment and beauty therapist.
Resources

The special resources for this unit are access to a real or realistic working environment which supports the provision of individual eyelash extension treatments in the salon. Learners must have access to health and safety standards, manufacturers’ instructions and individual lash extension products and tools.

Delivery guidance

Teachers are encouraged to use innovative, practical and engaging delivery methods to enhance the learning experience.

Learners may benefit from:

- Meaningful employer engagement so they relate what is being learned to the real world of work and understand commercial competence and the use of products, tools and equipment for individual eyelash extension treatments
- Work experience within a commercial beauty salon so they can practise their skills in a real environment
- Using interactive information and technology, systems and hardware so they can learn about concepts and theories; research current trends; research product knowledge and produce visual aids for individual eyelash extension treatments
Links with other units

This unit is closely linked with the following units:

**UCO28M Health and safety in the salon**

The Health and safety unit will provide knowledge and understanding of the responsibilities for health and safety as defined by any specific legislation covering the role of the professional therapist. This unit greatly underpins all practical unit delivery. Learners will be required to apply their knowledge and understanding of health and safety when preparing for and providing individual eyelash extension treatments in a real or realistic working environment.

**UBT95M Anatomy and physiology for the face and body systems**

Knowledge of the structure and function of the skin, as well as skin diseases and disorders most significantly underpins the knowledge and practical skills gained in this unit. Other elements of anatomy and physiology are also relevant to this unit in terms of understanding contra-indications to treatment as well as possible contra-actions.

**UBT90M Client care and consultation**

Client consultation before all beauty treatments is a legal requirement and failure to consult properly with clients prior to treatment could invalidate beauty therapy insurance. It is essential that beauty therapists elicit information from their clients about their medical history, including any allergies as well as checking for contra-indications. The client consultation unit underpins all technical units within this qualification and should be delivered prior to the delivery of any technical beauty therapy units.

**UBT119M/UBT119X Promote and sell products and services**

The ability to be able to retail effectively is a skill that is necessary to ensure effective contribution to any business. This unit will enhance a learner’s ability to work effectively within a team while covering the skills required to work within a wide variety of retail areas, dealing with retailing of goods, stock levels, customer orders and returns.
